

WALL MOUNT SPEAKERS

BS-678 BS-678T
BS-678B BS-678BT

Thank you for purchasing TOA's Wall Mount Speaker.

Please carefully follow the instructions in this manual to ensure long, trouble-free use of your equipment.

1. SAFETY PRECAUTIONS

- Before installation or use, be sure to carefully read all the instructions in this section for correct and safe operation.
- Be sure to follow all the precautionary instructions in this section, which contain important warnings and/or cautions regarding safety.
- After reading, keep this manual handy for future reference.

CAUTION

Indicates a potentially hazardous situation which, if mishandled, could result in moderate or minor personal injury, and/or property damage.

- To avoid electric shocks, be sure to switch off the amplifier's power when connecting speakers.
- Do not operate the unit for an extended period of time with the sound distorting. This is an indication of a malfunction, which in turn can cause heat to generate and result in a fire.
- Do not stand or sit on, nor hang down from the unit as this may cause it to fall down or drop, resulting in personal injury and/or property damage.

WARNING

Indicates a potentially hazardous situation which, if mishandled, could result in death or serious personal injury.

- Install the unit only in a location that can structurally support the weight of the unit and the mounting bracket. Doing otherwise may result in the unit falling down and causing personal injury and/or property damage.
- Do not use other methods than specified to mount the bracket. Extreme force is applied to the unit and the unit could fall off, possibly resulting in personal injuries.
- Tighten each nut and bolt securely. Ensure that the bracket has no loose joints after installation to prevent accidents that could result in personal injury.

2. FEATURES

- BS-678 series, of which cabinet is made of wood, can be installed in a vertical or horizontal orientation.
- Either concealed in-wall wiring or open wiring can be used for speaker cable connection.
- The speaker structure that permits direct wall-mounting with screws prevents the speaker from falling easily even if an outward force is applied to.
- The input impedance can be easily changed by changing the tap position of the transformer.
- Two built-in 6-inch double cone speaker units deliver high quality sound.
- The push-in type input connector makes cable connections easy and allows bridge wiring.
- BS-678T and BS-678BT have a built-in attenuator and can be connected to a 2-wire or 3-wire system.

3. INSTALLATION

Step 1. Pull out the baffle, unlatch 2 V-shaped springs, then remove the baffle from the cabinet.

Step 2. Install the cabinet to the wall using the supplied tapping screws 4 x 35. In this case, route the cables from a cable entry hole.

Note

The speaker can be installed in a vertical or horizontal orientation. Either concealed in-wall wiring or open wiring are available for speaker cable connection.

[Cabinet mounting dimensions]

Unit: mm (in)

- Ⓐ Cable entry hole (for open wiring at horizontal mounting)
- Ⓑ Cable entry hole (for concealed wiring at horizontal mounting)
- Ⓒ Cable entry hole (for concealed and open wirings at vertical mounting)

Step 3. Make wiring.

3-1. Insert the lead-in cables (cables from the amplifier) and lead-out cables (cables to other speakers) into the push-in connector attached to the cabinet.

[Applicable cable]

Solid wire: $\varnothing 0.8$ to $\varnothing 1.6$ mm (AWG 20 – 14)

Stranded wire (7-core): 0.75 to 1.25 mm² (AWG 18 – 16)

Note: The figure shows wiring for the BS-678/ 678B.

3-2. Insert the fasten terminals fitted at the ends of both the HOT (black) and COM (white) cables from the input connector on the cabinet into the taps of the matching transformer on the speaker unit.

Connect the COM (white) cable to the transformer's COM tap, and the HOT (black) cable to the desired transformer's input tap. (Refer to the figure below.)

Impedance	1.7 kΩ	3.3 kΩ	6.7 kΩ	13 kΩ
100 V line	6 W	3 W	1.5 W	0.8 W
70 V line	3 W	1.5 W	0.8 W	0.4 W

Step 4. Hook 2 V-shaped springs attached to the baffle into the slotted holes of the cabinet, then push the baffle onto the cabinet.

Note

When the speaker mounting orientation is vertical, pinch and rotate the logo mark on the baffle into the right position.

4. VOLUME ADJUSTMENT (BS-678T and BS-678BT)

Adjust the sound volume by rotating rotary switch on the speaker’s side panel.

Switch position	3	2	1	OFF
Sound volume	0 dB	– 6 dB	– 12 dB	off

Note: Switch position is factory-preset to “3.”
